

Affordable GPS Vehicle Tracking Systems

<p>Fleet Mobile Tracker</p>  <p>\$599.95</p>	<p>The Fleet Mobile Tracker is a cost-effective solution to the challenges of maintaining an efficient and effective fleet of vehicles. Whether your application is for a single vehicle or many, this SIMPLE TO USE solution is the right choice. This unit operates on 4 - AA batteries. It's ideal for supervising field service personnel, loss prevention and fleet management. The Fleet Mobile Tracker offers versatile GPS tracking that can be placed secretly or covertly into any vehicle within seconds. Know what people are doing with your company vehicles around the clock! Competitive products that cost less, rely ONLY on the cigarette lighter or a constant wired power source! Record vehicle movement, speed, location, and duration of stops. Generate complete daily activity reports. Includes software, operating manual & GPS antenna. Works anywhere in the world! No GPS Fees!</p>
---	---

<p>The Fleet Real-time Tracker offers a "real-time" solution for fleet management to see where vehicles are, anywhere within the continental United States. The longitude, latitude, Unit ID and other GPS information is transmitted via an AMS cellular modem to your computer or control center for display on a regional map. How does cellular GPS work? Simply program the base software to call a single or fleet of vehicles at a specified time (example: every 5, 15 or 60 minutes) to download GPS data. The base calls the vehicles, downloads information, then ends the call. A moving map instantly plots points with vehicle information and has the ability to print reports. The Fleet Real-time Tracker is an economical solution for fleet managers that require driver and vehicle monitoring. Basic cellular service is all that is needed for nationwide GPS coverage. Includes software, operating manual & GPS antenna. No GPS Fees!</p>	<p>Fleet Real-time Tracker</p>  <p>\$1,499.95</p>
--	---

<p>Fleet Covert Tracker</p>  <p>\$1,699.95</p>	<p>The Fleet Covert Tracker is real-time tracking unit designed for covert and secret applications. The magnet-mounted internal GPS & Cellular phone uses a highly efficient power source to operate up to 4 days on the external battery pack. An optional cable is included for connection to the vehicle power to enable longer term use. The magnet-mounted battery pack uses alkaline "D" cells for fast field replacement. An external amplified GPS antenna (magnet mount) allows the vehicle unit to remain entirely hidden from view while allowing GPS signals to reach the processor. Basic cellular service required. Works the same way as the Fleet Real-time Tracker. Includes software, operating manual, battery pack & GPS antenna. No GPS Fees!</p>
